

**FINN Bark Blower Models
Are Available For Every Size Job.**

(Units shown with options and various mounting configurations.)

FINN BB200

FINN BB302

FINN BB705

FINN BB1208/1216

FINN BB1222

Rotary Airlock
Our exclusive Rotary Airlock conveys a wide variety of bulk materials and particle sizes.

Radio Remote Control
Control feed and discharge rates while spreading, with control panel or radio control.

Dust Suppression
Control dust with the adjustable rate liquid injection system.

Air Pump
High volume, efficient air pump carries material smoothly through hose lengths of 300' or more.

Electric Tarp
At the flip of a switch, the tarp retracts for loading, and extends for covered transport.

Optional Seed Injector
The optional seed injection system allows for easy blending of seed into compost and soil blends.

**Increase Profits Through
Multiple Applications**

FINN Bark Blowers are so versatile, you'll be able to grow profits throughout the year. Use yours for:

- Bark Mulch
- Soil/Compost
- Lawn and Sports Field Overseeding
- Interiorscape Material Application
- Erosion Control/Berms
- Aggregate Installation
- Optional Salt/Sand Spreading

Corporate Overview

When Finn built the first Bark Blower, the company was on a course of innovation that continues to help landscapers get more productivity from labor and materials on their job sites. Today, the FINN Corporation continues setting standards for outstanding product quality, unequaled customer service and, above all, industry-leading equipment innovation.

FINN HydroSeeders®

Invented over 50 years ago, FINN HydroSeeders efficiently spray seed/mulch slurries on any size job.

FINN Straw Blowers

FINN Straw Blowers work at rates up to 20 tons per hour while minimizing material usage.

FINN Consumable Products

The FINN Hydroseeding Consumables are an exclusive blend of premium products that create the ideal growing environment.

Smarter Ways to Work since 1935...

BARK BLOWERS

**Produce
More Profit
With Every
Application**

Your profits depend on getting the most productivity from every dollar you spend. You hire people to perform multiple tasks—why shouldn't your equipment do the same?

FINN Bark Blowers are the most versatile performers you can find, delivering high quality results in landscaping, erosion control, and construction related applications.

With high production bulk material handling and accurate application, your workers can increase productivity up to 700%. And since FINN Bark Blowers apply uniform coverage, you'll achieve material savings of 25% or more.

Grow Profits with Erosion Control

Make erosion control a profitable business area with a FINN Bark Blower's versatility, increased productivity, and efficient use of materials.

"Our first machine saved us 700 hours in labor during the first week we owned it. We put guys to work in other areas to help us grow. Now we are making money on every mulch job we do. If we had not bought our FINN Bark Blowers, we would not be as big or as profitable of a company as we are."

Jim Kelly, President
Cambridge Landscapes
Cambridge, MA

Grow Profits As You Mulch

Produce beautiful results in less time, using less material. FINN Bark Blowers produce a stream of high velocity air that delivers the correct amount of material, exactly where you need it. FINN offers a full range of Bark Blowers with the right size and capabilities for every job.

Save Time Installing Playgrounds

Apply bark chips and other materials with consistent coverage and attractive appearance, even in hard-to-reach areas.

FINN equipment, legendary for reliability and durability, has been applying profits to our customers' bottom lines since 1935. Our Bark Blowers represent another way to work smarter—to use people and materials more efficiently and more profitably. The power of "smarter ways to work" can literally transform a company.

Productive Construction Partner

A FINN Bark Blower is the most versatile worker on the job site – delivering needed materials to hillsides, tough terrain, and all hard-to-reach areas.

Efficient Landscape Detailing

FINN Bark Blowers stay on the job throughout the year, making the most efficient use of labor and materials for maximum profit in any application.

Commercial Applications & Maintenance

Large commercial bark applications are made easy, even around delicate planting areas.

Residential Jobs Made Easy

Jobs that used to be labor-intensive are now efficient and profitable.

Save Money Spreading Seed/Soil Blends

Apply compost, soil mixtures, and seed in one step. There's no more efficient way to overseed or establish new growth, while adding beneficial material to the site.

Lay Down Profitable Compost Berms/Socks

Adjustable air flow rates allow precise material installation even with slow-flow compost filter berm applications. Also, FINN Bark Blowers are ideal for filling compost filter socks.
